IDENTIFIERS	*Hawaii

ABSTRACT

This report summarizes data on the high school background of students entering the University of Hawaii System for their first collegiate work since high school. The population is comprised of all new students at the two-year and four-year campuses between fall 1972 and fall 1975. Each of the five tables in the report examines a select group of entering students, as follows: (1) all entering students, regardless of high school background; (2) students entering from Hawaii State high schools, only; (3) June 1975 Hawaii State high school graduates; (4) 1972-75 Hawaii State high school graduates; (5) June 1975 Oahu high school graduates. The 9,158 students entering the University of Hawaii System in fall 1975 represent an increase of 3.6 percent over the 8,837 students entering in fall 1974. Over 70 percent (6,579) of these students entered the community colleges, of which 12.9 percent came from non-Hawaii high schools. The proportion of Hawaii State high school graduates entering the University of Hawaii System immediately after graduation has remained about 43-44 percent during the past three years. Of the graduates entering the system immediately after graduation, more students are choosing to enter the community college campuses rather than the four-year University of Hawaii at Manoa. (Author/NHM)

SUMMARY

This report briefly summarizes data on the high school background of students entering the University of Hawaii System in Fall 1975 for their first collegiate work since high school. Since Fall 1972, the population included in this study is comprised of all new students (primarily freshmen and unclassified students) at the two-year campuses (only new freshmen were included prior to 1972). At the University of Hawaii at Manoa (UHM) and Hilo College, however, the figures include only new freshmen and exclude new unclassified students.

Each table in the report includes a select group of entering students, as follows:

Table 1 includes all entering students, regardless of high school background.

Table 2 includes students entering from Hawaii State high schools, only.

Table 3 includes the entering students who were June 1975 Hawaii State high school graduates.

Table 4 includes a five-year summary of those shown in Table 3.

Table 5 includes the entering students who were June 1975 graduates of Oahu high schools.

Table 1

There were 9,158 entering students in Fall 1975, an increase of 3.6 percent over the 8,837 students reported for Fall 1974.

Approximately a fourth of them (2,193) entered UHM. Over 70 percent (6,579) entered the community colleges, of which 12.9 percent came from non-Hawaii high schools.

Since the last report (Fall 1974), graduates of Hawaii State public schools entering the UH System increased 1.1 percent (6,310 to 6,380), while those from private schools showed no change (1,121 to 1,120).

Table 2

The Hawaii State high school graduates entering the four-year campuses were primarily 1975 graduates (95.8 percent at UHM and 97.3 percent at Hilo College).

Of the 5,228 entering the community colleges, 69.4 percent were 1975 graduates and 18.4 percent graduated prior to 1971.

Table 3

The largest number of 1975 public high school graduates entering the UH system was 388 from McKinley High School, followed by Kaimuki (360), Hilo (340), and Farrington (336). The highest proportion were graduates of Laupahoehoe (67.5 percent).

From private schools, the largest number of entering students were graduates of Kamehameha (168), followed by St. Louis (117).

The various campuses of the University of Hawaii attracted more than half of the graduates from nine public and eight private schools, compared to seven public and five private for Fall 1974.

Table 4

The rate at which Hawaii high school graduates enter the UH System immediately after graduation (the going rate) reached a peak of 46.3 in Fall 1972 but has been slowly declining.

The going rate of students from Hawaii public schools entering UHM decreased from 16.9 in 1972 to 12.3 in 1975; from private schools the going rate decreased from 27.2 in 1972 to 21.9 in 1975. The going rate of students entering the community colleges increased from 25.0 in 1972 to 26.8 in 1975.

Table 5

The going rate of students entering the UH community colleges from all Oahu public school districts increased from 26.0 in 1972 to 28.3 in 1975, while the rate of those entering UHM declined steadily during the past four years.

Summary

The data included in this report indicate the following:

(1) The total number of students entering the UH System increased since Fall 1974.

(2) The proportion of Hawaii State high school graduates entering the UH System immediately after graduation has remained about 43-44 percent during the past three years.

(3) Of the Hawaii State high school graduates entering the UH System immediately after graduation, more students are choosing to enter the community college campuses rather than UH at Manoa.
